BOOK SYNOPSIS

The text that set the standard for students working toward certification in special education has been revised and updated to meet the needs of a new generation of teachers and students. A cross-categorical emphasis makes the book suitable for a broad number of courses--including those aimed at teaching students with mild disabilities and which are part of many states' certification requirements. The text describes the characteristics of learning disabilities as well as various mild disabilities, and offers teaching strategies for general education teachers, special education teachers, school psychologists, and other related professionals. Preservice and in-service classroom teachers, who are increasingly responsible for teaching students with special needs within general education or inclusive classrooms, will find the text especially helpful.
