BOOK SYNOPSIS

This book focuses primarily on diseases of field and greenhouse-grown vegetable crops that are caused by pathogens. Chapters dealing with the general principles of the causes, diagnosis and control of vegetable crop diseases are followed by crop-based chapters. Each entry includes a brief introduction to the disease, detailed description of symptoms, information on the pathogen and disease development, and suggestions on how to manage the problem. Top quality color photos illustrate the book throughout. The book contains technical information of interest to researchers, scientists, technicians and educators in plant pathology and agriculture, as well as practical, field-oriented information of use to farmers, field personnel and the agricultural industry.
